## COLLAGE WITH RECYCLED PAPERS

### DAY 1

These projects are inspired by the Parrish collection and by works in the Parrish's 2020 Student Exhibition from Oysterponds and Bridgehampton Schools.

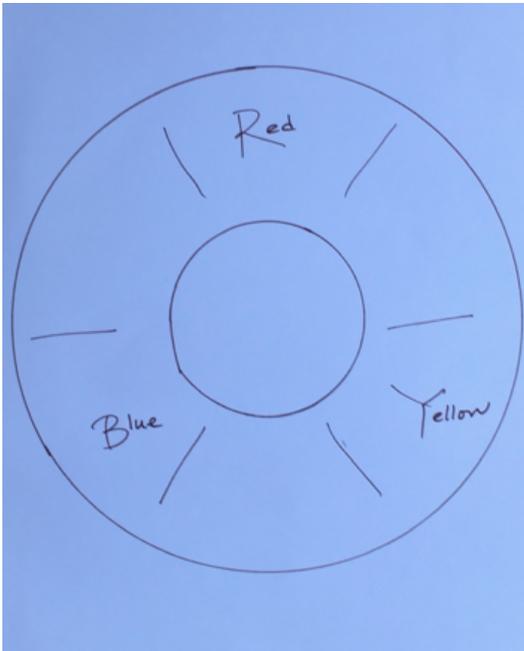

Papers, catalogues, and flyers arrive in the mail everyday—these are useful for at home artmaking! You may also have wrapping paper, construction paper, and tissue paper around the house that you can use. Begin with creating a torn paper collage of the Color Wheel and then move onto landscapes, portraits, and still life. All of these can be done as individual works or as a large collaborative work!

Learn about the primary colors Red, Yellow, Blue and the secondary colors of Green, Purple and Orange as well as the shades and tints of each color by making a collage color wheel.

### Materials

Assorted papers  
Glue (glue stick, white glue, or rubber cement)  
Scissors (optional)

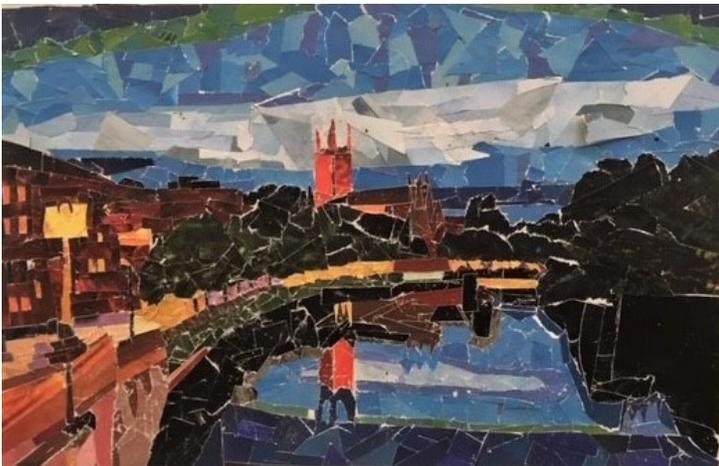

To do this at home, we traced a dinner plate and a glass to make a wheel and then labeled Red, Yellow, and Blue for the primary color areas.

Look through printed materials (we had three catalogues) to find examples of the primary colors to tear and paste into the appropriate areas, then fill in the secondary colors in between. As you work, notice the variations in each color.

## DAY 2

Replicate an image from the Parrish collection in paper collage!

This is a great way to look closely at a work of art. Search the Museum database and choose an image you like: <http://parrishart.org/artist-stories/#/collection>  
Sketch it out and then “color it in” by collage. Use your color wheel as reference to find the best shades of each color.

Here are a couple of suggestions to get you started:
